EDUCATION

Engineering in Systems

National Technological University

2018 - 2024

Associate Degree in Human Resources Management

IES University College

2018 - 2019

Bachelor's Degree in Business Administration

National University of Córdoba

2015 - 2017

CERTIFICATIONS

- Power BI Data Analyst PL-300 – Microsoft
- Data Analyst – Google Professional (Coursera)
- Data Scientist Specialization – Google
- AWS Certified – Amazon Web Services
- Deep Learning Fundamentals – IBM
- Deep Learning with TensorFlow – IBM
- PostgreSQL – LinkedIn
- Tableau Essentials – LinkedIn Learning
- Python for Data Science – IBM | LinkedIn | Kaggle
- SAP Functional Consultant – UTN
- Career Essentials in AI – Microsoft
- React & Web Development – Google Activate

EMILIO RANUCOLI

Systems Engineer | Data Scientist | Python Developer

PROFESSIONAL PROFILE

Systems Engineer & Data Scientist with strong experience in web application development and data analysis. Skilled in Python, Django, React, SQL, Power BI, and Tableau, I specialize in creating automated solutions and scalable dashboards that improve business decision-making and operational efficiency. Passionate about solving real-world problems through technology and currently seeking opportunities in fast-paced, data-driven environments—particularly within booking, fintech, and tech innovation teams.

WORK EXPERIENCE

- Python Developer – Eurobrico S.p.A. (Trentino, Italy)**
Nov 2024 – May 2025
 - Developed automation tools for retail logistics, reducing manual errors by 25%.
 - Created data pipelines and dashboards for sales and stock KPIs.
 - Integrated systems between departments to support digital transformation.
- Data Analyst & Power BI Specialist – Accenture (Remote)**
Jun 2024 – Nov 2024
 - Designed and developed interactive dashboards in Power BI, enhancing real-time data accessibility for decision-makers.
 - Conducted data cleansing and preprocessing to ensure accuracy in business intelligence reports.
 - Developed automated reporting solutions, reducing manual workload by 40%.
 - Implemented performance tracking systems for project evaluations and efficiency monitoring.
- Data Analyst and Power BI Specialist – Government of Cordoba, AR**
Nov 2023 – May 2024
 - Created interactive Power BI dashboards for visualizing key performance indicators, aiding data-driven decisions.
 - Worked with cross-functional teams to maintain data integrity during migration and performed thorough testing and validation post-migration.
 - Led BI reporting for public works programs, streamlining certification and monitoring.
- Data Analyst for AI Projects – Appen**
Jan 2023 – Feb 2024
 - Labeled and analyzed training data for ML models, improving data quality and model accuracy.
 - Worked in a global, multidisciplinary team to enhance AI pipelines.
- Pharmacy & Purchasing Analyst – Farmasut (Córdoba, Argentina)**
Nov 2015 – Nov 2023
 - Managed inventory and led a team of 5, reducing product loss by 15%.
 - Used Tableau for logistics optimization, achieving 10% savings in delivery costs.

PROJECTS

- Supply Chain Optimization – Accenture** | Tools: Python, SQL, Power BI
 - Developed predictive models and dashboards that reduced operational costs by 15%.
- AI Data Labeling for ML Models – Appen** | Tools: Data Quality, Annotation, Classification
 - Enhanced training datasets for NLP and recommendation engines, improving ML outcomes.
- Retail Web Application – Vultur** | Tools: React, Django, PostgreSQL
 - Built a full-stack app for inventory and reporting with authentication and data viz.
- Eurobrico Automation Tools** | Tools: Python, Pandas, Excel, Power BI
 - Automating reporting, email delivery, and inventory forecasting.

SKILLS

- Languages & Frameworks:** Python, JavaScript, Java, C++, SQL, Django, React
- Data Tools & BI:** Power BI, Tableau, Excel, Pandas, PostgreSQL, MongoDB
- AI & ML:** Scikit-learn, TensorFlow, Data Labeling, Data Cleaning
- Project & Dev Tools:** Git, JIRA, GitHub, SAP
- Soft Skills:** Analytical thinking, problem solving, adaptability, communication
